One day recently while riding to South Paris on "No. 2" which by the way has what is called a "flat wheel," a gentleman was noticed standing a short distance to one side of the road with both hands over his ears to deaden the sounds. "No. 2" needs no bell of alarm, she can be heard long before her approach. A stranger would clear the road for fear a runaway was coming. Ten Thousand Read this Paper.

The man who says he doesn't believe in advertising doesn't know what he is talking about. If he really believed what he says he would tear down his signs, board up his windows, cover his shelves, make kindling out of his store fixtures, and do business with intending customers through a hole in the wall. Newspaper advertising is only one form of advertising; all forms are good and they all work together to the one end—the sale of goods.

Mr. and Mrs. Wm. Delano, Mr. and Mrs. A. A. Towne, Franklyn Towne, Bertha Towne, Osmond Towne, Mr. and Mrs. Carroll Delano and Don Delano were guests at the old home, F. P. Towne's, making in all with Harry Gardin, thirteen at dinner, Thanksgiving day.

Belated, Overworked Collector of U. S. Revenue.

G. Conrad Brummer (with two dots over the u in his name) made a belated arrival here, Tuesday night and immediately got to work by introducing himself as the deputy internal revenue collector for this district with headquarters at Lisbon, N. H.

He made you feel Old Strawberry Bank in New Hampshire was only a flag station in the revenue collecting game as compared with that up country saw-mill town.

We were authoritively informed our duty lay in notifying the public that "the war revenue tax and stamp act" went into effect Dec. 1st, and everybody who didn't know it is subject to a fine. However, he intermated he might excuse us if we forthwith and without delay told our readers all about the beauties and penalties of this special so-called "War Tax" which seems to be so much over working him. See article elsewhere in this paper.

Over Night in the Woods.

Mellie Dunham and wife, Mr. and Mrs. Spaulding Abbott, A. P. Farnam and wife and W. A. Hersey, one of the town fathers, have returned from their hunting trip near South Arm, Richardson Lake, bringing one deer which was shot by Mrs. Dunham.

They occupied the Echo Camp and hunted in that vicinity. Several deer were seen and while there sixteen inches of snow fell. This was the night W. A. Hersey was unable to find his way back to camp and stayed in the bush and snow until daylight the next morning.

When Mr. Hersey found he was traveling in a circle and had come back onto his tracks in the snow and his matches were nearly exhausted, he wisely concluded to build a fire and wait for daylight. It was a dreary long night and will be long remembered by him and the party left in the camp.

A. A. Towne and wife and children came from their home in Ashland, Mass., to spend Thanksgiving at his father's, Frank P. Towne's. The family are to remain through the holiday season, while he spends part of the time in Massachusetts. He brought home a nice buck deer. He reports fine hunting in and about Ashland.

Millettville.

The Ladies' Sewing Club met with Mrs. Solomon Jackson, on Saturday of last week. It was a birthday affair. Her son Bradley was twelve on the 27th; and Mrs. Harry Jackson's daughter Verna was twelve on the 28th. Mrs. Charles Millett celebrated the 28th for her natal day, and Mrs. Jackson herself was born on the 30th of November, so what more appropriate than the big birthday cake decorated with all kinds of candy and bearing lighted candles, that adorned the center of the luncheon table. Eleven happy youngsters grouped about it and enjoyed the ice cream, hot chocolate with whipped cream, sandwiches, cake and fancy crackers. They were Leslie Millett, Marion Millett, Francis Millett, Vern Westleigh and Mary Jones (who was her over Sunday guest), Helen Chase of Lewiston and Elizabeth Patch of West Paris (who were visiting at Mrs. Harry Millett's), Bradley and Eleanor Augustine Jackson and Wallace Anson Bailey and Eva Marion Jackson, five and seven months old. The mothers and two grandmothers, one being also a great grandma to the little Anson, and other neighbors enjoyed their refreshments in the other room, after the usual social sewing bee.

IT'S A MISTAKE

Made By Many Norway Residents.

Many people in a misguided effort to get rid of kidney backache, rely on plasters, liniments and other make-shifts. The right treatment is kidney treatment and a remarkably recommended kidney medicine is Doan's Kidney Pills. Norway is no exception.

The proof is at your very door. The following is an experience typical of the work of Doan's Kidney Pills in Norway.

"Doan's Kidney Pills are the only kidney medicine I use and they always give me relief," says W. O. Needham, retired farmer, of Main St., Norway. "Several years ago I heard about Doan's Kidney Pills and I began using them. They got my kidneys working right and when that was done the uric poison in my system was removed. I procured Doan's Kidney Pills at Stone's Drug Store and I know that they can be relied on."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Needham had. Foster-Milburn Co., Props. Buffalo, N. Y. 48-49.

Mrs. Joseph W. R. Antolini is surely an artist with the needle. She does embroidery so nicely that it is a lesson and an aspiration in this kind of work to just look at it. ALBANY.

Then and Now.

The last carload of apples in town will be loaded Dec. 3d. Six weeks ago there were 2,000 barrels in town, today there not 100 barrels left for sale.

Forty-five years ago there were not 300 barrels of grafted fruit raised in the whole town. In those days the farmers were raising some grass seed and treading it out in the cold winter days with a pair of oxen. In the spring they hauled it down to the Rawson Hutchinson clover mill and had the seed ground out. Later on they sold the seed for 20 cents to 25 cents per pound. Raising hops was quite an item for a while, but soon died out.

Raising stock was the main thing in those days. It used to be quite a sight every two weeks to see the big droves of cattle go up through Hunt's Corner, with about 200 in a drove on their way to Bridgton. Many of the farms where they pastured so many cattle in those days are covered with spruce timber, and the lumbermen are making their fortunes getting it out.

D. A. Cummings finished packing Harry MacNally's, John Wheeler's and L. Andrews' apples, Nov. 20th.

If anyone wants to be sure of getting their horse put up they must telephone or drop a card a few days before hand. The first one who speaks for a horse stall is the first one served. The next dance at Grange Hall will be Saturday night, Dec. 12.

On Friday they were to go to New York, where Mr. Taylor has a call to preach near Cornell University, which affords him a chance to continue his studies. Much as we regret to have them leave, we know it is a fine opportunity for him. They are young people with rare qualifications and the best wishes of their friends folow them. Their endeavors always tended toward progress and a high standard. The Men's Club gave a farewell reception as a small token of their respect and appreciation of their work in our midst.

A WARNING TO MANY

Some Interesting Facts About Kidney Troubles.

Few people realize to what extent their health depends upon the conditions of the kidneys.

The physician in nearly all cases of serious illness, makes a chemical analysis of the patients urine. He knows that, unless the kidneys are doing their work properly, the other organs cannot readily be brought back to health and strength.

When the kidneys are neglected or abused in any way, serious results are sure to follow. According to health statistics, Bright's disease which is really an advanced form of kidney trouble, caused nearly ten thousand deaths in 1913, in the state of New York alone. Therefore, it behooves us to pay more attention to the health of these most important organs.

An ideal herbal compound that has had remarkable success as a kidney remedy is Dr. Kilmer's Swamp-Root, the great Kidney, Liver and Bladder Remedy.

The mild and healing influence of this preparation, in most cases, is soon realized, according to sworn statements and verified testimony of those who have used the remedy.

If you feel that your kidneys require attention, and wish a sample bottle, write to Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper, enclose ten cents and they will gladly forward it to you by Parcel Post.

Swamp-Root is sold by every druggist in bottles of two sizes—50c and $1.00.

Recollections of Early Settlers of Greenwood

By PROF. A. E. VERRILL of Yale University.

At the meeting of the Trustees, April, 1800, they appointed a committee to determine "whether anything shall be given by the Trustees towards building mills in the Academy half-township." At their meeting in 1801, a report was received as to the building of the mills and opening the road toward Bethel; and in 1802, Uriah Holt of Norway was appointed local agent. He held the office many years down to 1848. Therefore it seems that the road toward Bethel, through the grant, was made between 1802 and 1806, and that the Sanborn Mills were built in the same years, partly at least, at the expense of the Trustees.

The building of the mills, including a sawmill and a gristmill, must have been of immense importance to the early settlers, because before that they had to go to North Norway or Norway Village to get their corn or grain ground, or lumber sawed, and they usually carried their grain on their backs, unless one of the few horses could be had, for a ride on horseback.

At that time the mill stones were cut from the native granite by local talent, which was no small undertaking. The Sanborn mills were later rebuilt three or four times, and are now gone.

The old discarded granite mill stones were later often split across the middle and used for door steps. Some still serve this purpose.

Simeon Sanborn, soon after the road to Bethel was opened up, built near the mills, a small tavern. This indicates that there was considerable through trade and "teaming" as soon as the road was built.

Not many years later, probably about 1820, the road from North Norway up to Greenwood, along the eastern side of Hicks Pond, was built, past the place where Greenwood City was to be located, and so on to Locke's Mills and Bethel. This was a much less hilly road, and soon all the through travel went that way, causing the old road across Patch Mountain to be abandoned, except for local use. Accordingly Sanborn's tavern was torn down and its good pine lumber was used to build a tavern at Greenwood City, which was subsequently occupied by Wm. Noyes.

Simeon Sanborn was a veteran of the Revolutionary war. He had nine children, eight of whom grew up and married:—Stephen, born 1783, married Sarah Longley, daughter of Eli Longley of Waterford; he died in 1854. Mary, born 1796, married Frederick Coburn, already mentioned, she died 1863. Joseph, born 1788, married Lucy Verrill of Minot; he died 1856. John, born 1790, married N. Barker of Newry; died 1853. Hannah, born 1792, married John Merrill of Bethel; she died 1859. David, born 1796, married Virtue Bartlett, and settled in Bethel. He died in 1868. Lettice, born 1797, married Samuel Verrill; she died 1875. Lucy, born 1799, married first ——— Poland; second, Jacob Rollins, New Gloucester; she died 1882. Esther, died in infancy. Of these only the first two lived in Greenwood after marriage.

Stephen Sanborn lived for a time near his father; later in Norway. He had ten children, who grew up, most of them married and left this vicinity.

Simeon Sanborn's farm was west of the road and his farmhouse was situated on a short cross-road running west, up the valley, about a third of a mile. It was later occupied, I think, by J. Whitney; and still later, about 1876, by Lorin J. Roberts, noted in the neighborhoood for his unusual profanity. Simeon Sanborn came from Standish or Bethel, Maine, to Norway, but he soon moved to Greenwood. He had served in the Revolutionary War and was a pensioner. He married Hannah Ward.

The eldest son, Stephen, married Sarah (or Sally) Longley, daughter of Eli Longley of Waterford, long a prominent hotel man there. She was born in 1790 and died in 1877, aged 87. They had thirteen children, three died in infancy. Most of this family are enumerated in Lapham's history of Norway, page 591, and they are more fully noticed in O. N. Bradbury's articles, "Norway in the Forties," Nos. 133 and 134, published in the Advertiser some years ago. Therefore a brief notice will suffice here.

David, born 1817, fifth son of Stephen, married Lydia C. Cordwell, daughter of Wm. Cordwell of Oxford, who was twin-brother of Eunice (Cordwell) Verrill of Greenwood. She died after having had four children, two of whom died in infancy. Horace and Ella grew up. His second wife was Martha J. Hamlin. She had a daughter, Bertha, born 1866, who married Henry R. Crosby.

David learned the blacksmith trade at Swift's Corner, and later worked at his trade with Eben Hobbs, in Norway Village. Lucy, a sister of David, married Charles S. Robbins, who lived in Stark, N. H., Biddeford, Me., and many other places, and was at Norway, 1854; he died 1886. He was a veteran of the Civil War. He was in the 10th Maine Regiment. She died 1907. Her daughter, Martha E., who was born in 1851, married Walter Anderson. He settled in Norway, where he still lives.

Another early settler in the Sanborn Brook valley, was Amos Richardson, whose house was on the east side of the road, a short distance beyond the bridge. He married Abbie Cordwell, mentioned before, and had one son, Joseph, who died young. He rebuilt the old Sanborn sawmill. Later, this or its successor was owned by Whitney and Richardson. Finally the last mill built there was moved to West Paris. Near the old millpond, there is now only the recently built camp of the Overset Club.

Just beyond the Richardson farmhouse there used to be an old log house, occupied before 1856, by C. Caton. It was gone in 1876. Opposite this was a short cross-road running to the west, leading to the Thos. W. Furlong farmhouse, occupied by him and his grandson, George W., up to 1860. Thomas W., previously described, died there in 1861, aged 87½ years. He was active up to the day of his death, and died suddenly, while engaged in sawing firewood. The farm belonged then to his son, Matt Furlong, of Portland, who buried his father and also his mother, who died there about a year later at a very advanced age, said to be over 100 years. as already mentioned in a former article.

Designs from Indian Peoples.

The United States National Museum announces that it is exhibiting some designs and silk dress goods which use the designs and symbols left by the Aztecs and other early Indian peoples. Much material for designs pertaining to this early period of American history was available; buildings, temples, monuments, pottery, basketry and blankets are covered with picture writings which form artistic designs.

Not only the designs proper were adaptable but the color as well, a fact which has materially assisted in the creation of these new American fashion designs. The textile division of the museum has installed a series of pure dye taffeta silks, contributed by the manufacturers, which show the reproductions of these ancient Mexican designs printed on soft, clinging fabric. The designs comprise the Aztec moon in rainbow tones on blue and taupe; the Aztec armadilla and arrow pattern in colors on peacock blue; Kortez—an Aztec hieroglyph—on dark green and satin striped white taffeta; the Aztec coat of arms on navy blue, and an allover design of Mexican feathers in shades of blue, green and brown.

Other designs are reminders of the Pueblo Indians, one consisting of a rattlesnake symbol printed on Indian red, while another resembles a Navajo rug in which zigzag stripes and a diamond arrangement of figures appear.—[Science.

Maine Crop Yield Third Highest in Union.

The combined crop yield in Maine this year, is only exceeded by the crop yields of the state of Kansas, and the state of Nevada, and the difference between Maine and Nevada is only 2 of one per cent. which practically makes Kansas leading in crop yield, with Maine and Nevada second.

Reports show that every state on the Atlantic border this year shows a condition as compared with other years, of above 100 per cent. The poorest showing is made by Missouri with a yield of 84.6, while Illinois also reports the low condition of 85.3.

Kansas reports the largest combined yield as compared with other years at 124.2, while Nevada has 118.6 and Maine 118.4. Massachusetts follows with 116.3 and New Hampshire next with 113.8.

A Municipal Christmas Tree.

Isn't it about time to wake up and join your sister towns and cities in having a municipal Christmas tree? Wherever it has been tried it has proved a great success—a public symbol of belief in Christmas and its spirit.

Think of having an immense tree set up in the square, brilliantly lighted, beautifully decorated and filled with gifts for those who may not be richly remembered at home. In this way the season takes on a new tone. It becomes more of a public function and less of a fireside celebration.

It becomes more generous in its spirit, less selfish in its actuality. Not that the home Christmas need be done away with, but that it be broadened in its scope so that all may participate. Why not have a municipal Christmas tree?

HUSTLE FOR THE HOME MARKET

In the November American Magazine appears a highly interesting and practically suggestive article entitled "How the War Has Opened a Business Opportunity to America." The author says that in 1913 we imported from Europe $120,000,000 worth of goods that we ought really to manufacture ourselves. With these importations cut off, a great opportunity is offered to American manufacturers. In the following passage the importance of this fresh opportunity is elaborated:

"Think of importing nearly a million dollars' worth of soap; three and a half million dollars' worth of pickles; a million and a half dollars in beans; nine millions in cheese; seven and a half in gloves; two and a half in carpets; and so on through hundreds of items, down actually to half a million in peanuts!

"There is $120,000,000 worth of business right here in the home market that if I were a manufacturer I would hustle for before I began to bid for the foreign trade. If we can't meet the home demand for quality on things like these, it is time something happened to make us learn how. If we can't make pickles and cheese and weave carpets and raise beans and peanuts to suit our long-time market, it is time something showed us the reason why.

"Here is the biggest opportunity opened to us by this war, it strikes me—the chance to re-form production and get it on a new basis. We have only ourselves to blame if the American consumer is fascinated by the word 'Imported.' Between the protective tariff and the natural pressure on production, our industries have been pampered out of balance. We know how to keep costs down, but we have a lot to learn about quality and service. Now we can get our genius and enterprise at work making goods that will really stand up with anybody's and then we will begin to see something in the legend 'Made in U. S. A.'

We can't do it. Why? Because much of the hustle and work and endeavor has been talked and educated out of our young people. The people are taxed for our splendid school system that the pupils may get the idea that their education is not for a wider scope of usefulness and benefit to themselves and the world, but as one young man expressed it when, after finishing High school he wanted to go to college, "That he might get something to do that would pay more and he would not have to work so hard."

"What do you think of educating yourself for," was asked.

"Have not decided yet. Shall have to wait till the second or third year in college and see what I am fitted for," was the answer. What would he be fitted for if he did not fit himself for something?

The pupil and youth the not half so much to blame as the talk and acts of parents and older people. We once heard a minister of the gospel address a graduating class and one of the things he said with a sneer sounding in his voice on the hewers of wood and bringers of water, was:—"You want to go to school and learn so you will not be merely hewers of wood and bringers of water. You want to fit yourselves for positions that bring higher renumeration."

Thousands of parents have educated their children so that "They would not have to work so hard" as the parents had.

FORD HUNTING IN MAINE WOODS.

That success can only be attained through the observance of minute details even on a hunting trip in the wilds of Maine is the claim of Warren H. Beede of Lynn, Mass., who returned after a month's sojourn in the Maine Woods. As a hunter Mr. Beede is proud of the results of his trip, but as a through sportsman he is more proud of his equipment and that is what he terms his auto-kitchen-dining-sleeping-room-armory-express-freight-mobile.

Mr. Beede left home with his hunting companion, Oliver Chapman, also of Lynn but who was formerly a Kezar Falls boy, for his annual trip to the Maine woods, and since that time he did not sleep or eat under a roof other than the hood of his Ford automobile, while on the trip. Blessed with a mechanical ability he has been experimenting with his machine, so that when he started he had a veritable hunting machine, as thoroughly equipped in its own peculiar use as the noted automobiles in present use in Europe. Leaving only the original front seat and the chassis of the machine he has arranged a contrivance in the vehicle line that would bring results if patented.

The body of the car was lengthened about two feet and in the place of the rear seat is a gun rack, ammunition box and sleeping bunks for three persons. In one corner is a folding kitchen, that is, a receptable for a cook stove and a closet with dishes and utensils. The interior is lighted by electricity. On one side are hooks, on which a tabe may be suspended and instead of mattresses in the collapsible bunks, folding air mattresses and sleeping mats of rubber are used. The mudguards are so arranged that they can be used as shelves for the carrying of big game, while along one side of the interior is a small game box.

They took on a guide. The party of three went into the woods. Two snow storms were encountered, and in one instance they plowed through to the depth of eight inches.

Mr. Beede reports that the game was plentiful and fat. They bagged several partridges and coons and saw a number of porcupines. The entire trip was made in the automobile. On each side of the car on the return trip were two deer, each man being allowed to take two from the State. When asked how many they actually got, Mr. Beede answered: "Well, we got as many as the law allowed, and had plenty to eat."

At the start provisions were carried for one month, but the ideal warm weather conditions and unusually healthy appetites, the supply hardly tided them over. Although Mr. Beede is an old hand at the hunting game, he declares that this was the best.

The Annual Hustle.

"Until after the holidays," that is the answer of everyone when asked to do anything at present, for everyone is busy until the gift making and planning is over. On every hand one sees the great preparations and on every hand one sees that there is really a disposition to shop early in order to assist those who must make long hours during the holiday rush. Our part of the Christmas celebration may be to make it easier for those who must toil overtime at this season, and we may just as truly do our part by saving labor by doing our buying early as in any other way.

RAISE BEEF HERE.

The day of the great western range is gone. The time when fifty or a hundred might be given to feeding one steer is no more. The public lands leased for grazing purposes have passed into private hands and been cut into homesteads, and as the owners find larger profits in cropping their land than grazing it, the supply of western cattle at the great packing points has been showing a steady decrease. The deficit in the supply will be emphasized to a considerable extent by the extensive slaughter made necessary by the outbreak of hoof and mouth disease.

New England once produced more cattle than were required for feeding its own population. The decline came with the opening of the western ranges. The substitution of horses for oxen for farm work, as cultivation made the fields smoother and more easily worked, completed the process which the opening of the West began, so that now New England takes most of the beef for consumption from the West.

Good judges assert that beef raised in the eastern states, if properly ripened before going on the market, is superior in flavor to the beef of the West, just as the juicy apple of the Maine orchard is superior to larger and more showy fruit from the irrigation areas of the West. The existing prejudice against "native" beef is largely due to the lack of refrigerating systems here by which native beef can be hung until the fibres have broken down enough to become tender. It lacks nothing of the juiciness or flavor, but as now marketed it is tough. If present efforts of the packers to increase the supply from this section succeed, proper facilities will be provided to handle and care for the product.

When grazing land could be leased for a few cents an acre and the cattle required no housing in the winter, New England farmers who have turned their attention to dairying instead of beef production may not have their innings. There are extensive areas in all the New England States, now under partial cultivation, producing scanty crops that afford slight returns to the cultivator, which might be devoted to pasturage. Some of these lands, once cleared and cultivated, have been permitted to grow up to wood. In other cases a half-hearted attempt is made to keep them under cultivation. Cattle raising ought to be more profitable. Let New Englanders look into it.

A Nation Transformed.

There is prohibition in Russia today, prohibition which means that not a drop of vodka, whisky, brandy, gin, or any other strong liquor is obtainable from one end to the other of a territory populated by 100,000,000 people and covering one-sixth of the habitable globe.

It should be said in the beginning that the word prohibition in Russia must be taken literally. Its use does not imply a partially successful attempt to curtail the consumption of liquor resulting in drinking places, the abuse of medical licenses and general evasion and subterfuge. It does mean that a vast population who consumed $1,000,000,000 worth of vodka a year; whose ordinary condition has been described by Russians themselves as ranging from a slight degree of stimulation upward, has been lifted in one day from a drunken inertia to sobriety.

On that day when the mobilization of the Russian army began, special policemen visited every public place where vodka is sold, locked up the supply of liquor, and placed on the shop the imperial seal. Since the manufacture and sale of vodka is a government monopoly in Russia, it is not a difficult thing to enforce prohibition.

From the day this step was taken, drunkenness vanished in Russia. The results are seen at once in the peasantry; already they are beginning to look like a different race. The marks of suffering, the pinched looks of illness and improper nourishment have gone from their faces. There has been also a remarkable change in the appearance of their clothes. Their clothes are cleaner, and both the men and women appear more neatly and better dressed. The destitute character of the homes of the poor has been replaced with something like order and thrift.

The one man directly responsible for this is Michael Demitwvitch Tchellsheff.

Get Acquainted With Home.

It is very likely that when the nations now warring in Europe have finished shooting to pieces the scenery, our American tourists will of a necessity be compelled to do a little Seeing America First. And they will find much to open their eyes, to fill them with amazement.

Those who feel that earth has no joys to equal those which follow a scramble over the Highlands of Scotland, or a tramp through the English Lake district have a distinct surprise coming to them.

To be sure, those captivating foreign regions do afford adorable combinations of mountains and lakes, bens and lochs, but we are prepared to say that our own State of Maine offers charms equally as adorable, as wonderful.

Amen, and Amen.

Prayer by Preacher Russell H. Conwell:—

"O Thou who hast compassed all the pathway of our lives; we thank Thee that Thy providence abides through every change. Thou dost cheer the lonliest lot with the comfort of Thy presence, and we bless Thee for Thine unfailing care.

"Give us grace to serve Thee with our whole lives, that all manner of darkness and evil may be driven from our hearts and that we may walk with joy in the way of Thy commandment to love Thee with our whole heart, and our neighbor as ourselves. AMEN."

One guide was heard to instruct some of his young charges in the forest, the morning after the snowstorm of Tuesday, Oct. 27. He told them that if they came across a fresh track they felt sure had been recently made by a passing deer to take that track and follow it steadily, for it was a sure thing that they would encounter something on the other end of that track. These same boys found the desired track and followed it and they brought home a heart and liver that night.

A town needs team work as much as it does a base ball team or business organization. When a large majority of the people work for any one object they have no difficulty in attaining their purpose. But if instead of working together they let envy, jealousy and spite dominate their actions they will accomplish nothing worth while. A ball team composed of players dominated by such a spirit will never win the pennant.

PREACH AND PRACTICE.

Lesson No 1.

If that dollar had been enclosed in an envelope and sent to some catalog house, instead of being spent here it would never serve this community again. Your home place would be just a dollar poorer. The available liquid capital would have been just one dollar less.

There is no better lesson that we could teach than the imperative lesson of keeping our money at home, to work for us, to help make our merchants more prosperous, to help make our local trade heavier, to help pay taxes, to help school houses, to protect our homes against theives and fire; in short, to aid in making home a better place in which to live.

And keeping our money at home costs no one anything. Goods attractively advertised in beautiful catalogs are the same goods which are to be found on the shelves of our stores and the prices when cost of transportation is added, are either the same, or less. In this case, both municipal well-being, and the interests of the buyer, are identical. "Keep Your Dollars at Home."

Right here let us say that it is not the poorer class of people that are the most to blame in this respect, but our merchants, professionals and business men. If they are prosperous they often get the "big head." They sneer at their home markets and their home institutions (that largely support them). They want the stamp of a larger place on their clothes even if the clothes are inferior. If they want anything outside what they themselves carry in stock, they wait till they "go to the city" and purchase it and let their neighbor merchants' goods lay on his shelves. They even tell their friends of the way they do and then whine "poor business" because the friends do as they do—buy abroad.

Treatment for Sprains.

The best treatment for a sprain is hot water. It relieves the soreness and reduces the inflamation. Absolute rest is necessary. After bathing the injured part with hot water it should be bandaged and kept damp with witch hazel.

If the sprain is very bad this treatment may be used until the doctor arrives.

Always keep a bottle of tincture of ammonia in the house to be used in case of bruises, cuts or wounds; wet a cloth with it and it should be applied around the injured spot. It will be found to be cooling and soothing.

Arnica, diluted with warm water acts like magic in soothing tired, swollen feet, and a foot bath of this every other night is very good.

Apple Catsup.

Peel and quarter one dozen sound tart apples. Cook until soft in as little water as possible and put through sieve. To one quart of sifted apple add one teacup sugar, one teaspoon each of pepper, cloves and mustard, two teaspoons of cinnamon, two medium-sized onions chopped very fine, one tablespoon of salt and one pint of vinegar. Boil about one hour. Bottle while hot.

PURE RICH BLOOD PREVENTS DISEASE

Bad blood,—that is, blood that is impure or impoverished, thin and pale,—is responsible for more ailments than anything else.

It affects every organ and function. In some cases it causes catarrh; in others, dyspepsia; in others, rheumatism; and in still others, weak, tired, languid feelings and worse troubles.

It is responsible for run-down conditions, and is the most common cause of disease.

Hood's Sarsaparilla is the greatest purifier and enricher of the blood the world has ever known. It has been wonderfully successful in removing scrofula and other humors, increasing the red-blood corpuscles, and building up the whole system. Get it today.

Cake for Everybody.

A proficient cook has an eye to variety and suitability. Even in the matter of cakes she is careful to suit all tastes. Thus:

For farmers—hoe cake, fruit cake and seed cake.

For pugilists and carpenters—pound-cake.

For reporters—Spice-cakes and jumbles.

For messengers-boys—Ginger snaps.

For politicians—Election Cake and plum-cake.

For idlers and ne'er-do-wells—Loaf cake and fritters.

For tramps—Sponge cake.

THE WAR TAXES.

The larger portion of the new revenue law became effective as soon as it had been signed by President Wilson, some sections went into effect November 1, and the remainder became operative December 1. On the former date the tax began on bankers, brokers and proprietors of theaters and circuses, and on tobacco dealers and manufacturers; and on the latter date it began on the numerous articles specified in schedules A and B, these latter being the adhesive stamp taxes. For the most part these stamp taxes will fall directly upon the consumer. They are:

Bonds, debentures, certificates of indebtedness, and the like, five cents for each $100 of par value.

Sales of stock or agreements to sell, two cents for each $100 par value.

Agreement of sale of products of merchandise on exchanges, one cent for each $100.

Norway National Bank Now Working Under Federal Reserve Act.

On November 16th the new National Bank Law, known as the "Federal Reserve Act" became fully effective. The Norway National Bank and all other National banks are therefore now operating under this new system.

The business world will quickly feel the good result of this law's influence. The provisions of the Federal Reserve Act not only put millions more in circulation, but greatly broaden the national bank's ability to meet the requirements of the commercial, industrial and agricultural interests of its community.

Under the new law substantial portion of the money that national banks have heretofore been required to hold in their vaults as a cash reserve, is released for circulation in business channels. According to the estimate of the Comptroller of Currency, John S. Williams, the reserve released will total about $500,000,000.

Provision is of course made for a proper cash reserve, and supervision and regulations more stringent than ever before protect public interests. This vast national bank system of which every national bank, is a unit, is directed by a Federal Reserve Board composed of the Secretary of the Treasury, the Comptroller of Currency and five widely known bankers appointed by the President of the United States.

New standards of capitalization for member banks are set by the law. In towns of less than 3,000, $25,000 is the minimum capital necessary. As population increases the minimum capital required also increases until $200,000 capital is specified as the minimum in cities of 50,000 and over. The Norway National Bank is capitalized at $50,000.

Every bank is limited as to the amount of loans to any one depositor. Governmental funds, postal savings, etc., are deposited only in national banks, and Federal examinations will be even more stringent than heretofore.

Need of a stable currency system has been the cry of bankers and the business world for many years, and this is now assured, because of the powers possessed by the Federal Reserve Board, which will tend to prevent financial stringency or undue centralization of money at one point National banking methods are standardized, and deposits are safe-guarded securely through the general supervision of the Federal Reserve Board over the business of the entire system, in addition to frequent strict examinations of the member banks by United States bank examiners.

Under the Federal Reserve Act, the country is divided into twelve districts. In each district there is a Regional Reserve Bank in a city designated by the Federal Reserve Board, and every national bank in the district is a member of the Regional Reserve Bank.

The twelve Regional Reserve Banks are located in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas and San Francisco. Their combined authorized capital totals $106,795,600.

The Norway National Bank in this town belongs to the first district, with its Regional Reserve Bank located in Boston.

David W. Noyes.

David W. Noyes died at his home, 1120 Commonwealth Ave., Brookline, Mass., Tuesday, Nov. 24. He was the son of Claudius A. and Rowena (Cox) Noyes and was born in Norway 67 years ago on the farm now owned and occupied by Alvin Brown.

When about eighteen he went to Boston where for a time he was employed by Jordan, Marsh Co. After which with his brother he engaged in business at the corner of Washington and Summer Sts., where as Noyes Bros. the furnishing store became widely known.

A few years ago Mr. Noyes severed his connection with this store and devoted himself to the Noyes Waist Co., at 72 Bedford St.

Mr. Noyes leaves a wife, one daughter, Grace Noyes, and two sons, Gordon A. and Chester Noyes of New York. The funeral was Friday, Nov. 27. Burial at Mt. Auburn.

Mr. Noyes was a grandson of the late David Noyes, historian of Norway.

Thanksgiving Ball.

The 31st Annual Thanksgiving Ball held at Norway Opera House Thanksgiving evening, under the auspices of Pennesseewassee Lodge, No. 18, K. of P., has put into Norway's history another enjoyable and successful event. Milliken's orchestra of six pieces gave the dancers fine music. The fifty-one couples from the start of the grand march led by floor manager, Thomas Thibodeau, and daughter, Tessa Thibodeau, to the finish of the order of eighteen dances besides extras, had a royal good time.

Refreshments of ice cream (Stone's) and cake were served. The gallery was well filled with spectators who enjoyed the brilliant scene—the neat, becoming and pretty ball dresses of the ladies, the happy faces and the graceful movement of the dancers.

Kate G. Nelson, the Bible missionary, who is working in Norway for six weeks or more, is at Mrs. Lucelia Merriam's on upper Main street.

77th Birthday.

Mrs. Angie Bolster of South Paris was given a surprise party by her friends and neighbors on her 77th birthday, Nov. 24.

She was presented with a very handsome brooch pin and a beautiful birthday cake. Refreshments were served and a poem was written and read by Mrs. H. E. Wilson. A pleasant evening was spent and about 25 were present.

Seventy-seven long years have passed
Since you first saw the light of day;
And may there be many, many more
That you may with us may stay.

Our lives are but a passing cloud,
Full of sunshine, full of tears,
We have our sorrows, and we have our joys,
We have our sadness and our tears.

Our years seem but days
Which pass so quickly by,
But soon our birthdays will be o'er
And we shall all be at Home on high.

And as our birthdays come and go,
Let us enjoy them while we may,
Let's make our lives and others full of sunshine,
And thus the world will be one long May.

One of the beautiful things in this world to see
Is old age, gray hair and a grandmother to three;
After our lives have been lived
And the sun is sinking in the West,
What is there to comfort you more than the words,
Mother and Grandmother we love you best.
May the remainder of your life be full of sunshine,
And your pathway strewn with flowers,
And may each year of your life spent here
Be as one long glad hour.

When this little hour which we spend
Together tonight is past,
May it be a happy remembrance to you, my friend,
For true friendships always last.
We are wishing you many happy returns
Of this day as each to you say good-night,
And may all your birthdays be happy,
Full of joy, beautiful and bright.

* * * * *

In a chimney corner as of old today,
Someone now is sitting, and her hair has grown gray,
But her soldier lover with his love so true,
Evermore is sleeping 'neath the heavens so blue;
Yet her lamp of life is burning low,
But to her comes the happy memories of long, long ago.
Faces, firelight faces, faces sad and gay,
Faces sweetly smiling from the far away;
Time glides by unheeded for we never tire
Of watching those faces in the fire.

Cosy Comfort When It Storms. The 1915 HUDSON Six-40 Cabriolet Price $1750, f. o. b. Detroit

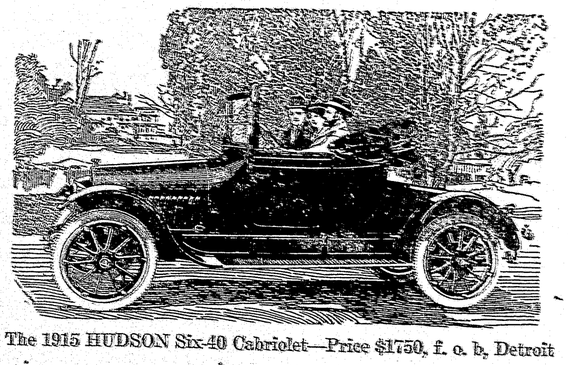

This Hudson Ideal for Physicians

The ability to have a completely enclosed car, or an open roadster, practically in a minute or two, appeals to men whose occupation necessitates disregard of weather conditions. Because it so perfectly meets the every-day needs of the doctor and the salesman, the HUDSON Convertible Roadster—or Cabriolet—has been purchased by many prominent physicians and business men. They find it—mechanically—an ideal motor car for their unusual demands. Its six-cylinder motor provides ample flexibility. Many drive their cars through all kinds of city traffic without it being necessary for them to change from high gear. Yet speed may be attained very quickly.

Rapidity in "pick-up" and "get-away" is a strong feature of this car and there are many others. Let us demonstrate it to you.

Our National Thanksgiving.

It is to a woman that our present annual observation of Thanksgiving as a National holiday is largely due. This woman, Mrs. Sarah Josepha Hale, was then editress of Godey's Lady's Book. She made the suggestion of nationalizing the day shortly before the Civil War.

However, the Book of Common Prayer, which was especially revised in 1789 for the use of the Protestant Episcopal Church in America, had long previously directed that unless another day should be appointed by the civil authorities, the first Thursday in November should be observed as a day of thanks. In 1815, Thanksgiving was celebrated by twenty-five States and two territories.

A one cent internal revenue stamp will have to be affixed to the following goods, forwarded in baggage cars on passenger trains: Baby carriages, go-carts, children's sleighs, sleds, velocipedes, bicycles, bicycles, cahoes, racing shells, coffins, and other funeral supplies, cut flowers, dogs, emergency shipments, milk and cream, peddler's packs and baskets, small domestic pets, special baggage cars, toboggans, skis, snow-shoes and theatrical paraphernalia, excepting trunks containing personal effects. Ordinary baggage will not be taxed. The stamp should be cancelled by the shipper by writing his name and the date on the stamp to prevent its being used a second time and a penalty is provided for failure to affix and cancel stamp as provided by the law.

Don't forget to renew your Times, Times-Star, Week-World before the time expires. This will save you the loss of a paper or two.

Maine Represented.

The fish and game department of Maine was unable, through lack of funds to prepare an exhibit for the Panama Exhibition at San Francisco but Maine will nevertheless be represented, Nash, the Norway taxidermist, having an exhibit ready for shipment. It consists of some splendid deer and caribou heads and some very fine fish. The specimens are perfect and the work of mounting simply first-class. The exhibit will be a credit to the State and to Mr. Nash.

In this country fourteen states have adopted prohibition. In others, large sections are under a prohibitory law, and it is probable that a majority of all the voters are ready to vote for National prohibition. But it will require time and considerable agitation before the matter will be decided. In Russia it only required the edict of the Czar and it was done.

HUB-MARK RUBBERS

A HURRY CALL

for rubbers on a nasty wet morning suggests Hub-Mark rubbers to most people. Nowadays wise folks consider Hub-Mark rubbers as essential to the complete wardrobe as a pair of shoes, especially in this climate where the three seasons are June, July and Winter.

Hub-Mark rubber footwear is made so everlastingly good that it will give the tough pavement a terrific tussle before it gives in. Hub-Mark Rubbers cost no more than any standard first-quality rubbers, but when you buy them you are buying for not only one season, but perhaps two. It's the rubber of the present as well as the future. Made in a great range of styles for men, women, boys and girls.

When you buy rubbers ask for "Hub-Mark." It's best because there are no regrets.

These rubbers are manufactured by the Boston Rubber Shoe Company, Malden, Mass.

An Opportunity for Household Economy

The great advance in price of cream of tartar—which is derived from grapes—due to inability to care for and market the grape crop in the European countries now at war, can be made advantageous to the housewives of New England.

Housekeepers will find it more economical and much more satisfactory to use Royal Baking Powder, which is made from highly refined, pure cream of tartar. First, because the price of Royal has not been changed and it will do perfect work; second, because food made with Royal Baking Powder will be finer and more palatable; and finally, because it insures the absence of all danger from alum or similar unwholesome products.

The old-fashioned custom of buying cream of tartar and mixing it with soda, or using sour milk, may be discarded with profit. The high cost and scarcity of cream of tartar furnishes a temptation to unscrupulous dealers to substitute an adulterated product, which may be either lime phosphates or alum, that will change the baking strength and may spoil the food.
